SV250-25 CoreSnapshot 2

## SV250-25 CoreSnapshot 2

### Overview

SV250-25 CoreSnapshot 2 Client Edition is built with a powerful SATA controller that supports on-the-module ECC as well as efficient wear leveling scheme and implemented with LDPC (Low Density Parity Check) ECC engine to extend SSD endurance and increase data reliability. Furthermore, SV250-25 CoreSnapshot 2 Client Edition is equipped with a built-in thermal sensor to monitor the temperature of the SSD via S.M.A.R.T commands to prevent overheating. For highly-intensive applications, End-to-End Data Protection ensures that data integrity can be assured at multiple points in the path to enable reliable delivery of data transfers. Security-wise, Advanced Encryption Standard (AES) ensures data security and provides users with peace of mind knowing their data is safeguarded against unauthorized use at all times.

On top of that, SV250-25 CoreSnapshot 2 Client Edition features CoreSnapshot 2, a system disaster's savior, to offer an instant whole disk backup and recovery mechanism for SSDs to solve unexpected data loss or OS crush immediately, reducing downtime and maximizing output.
