

TK060.900

Height Adjustable Arm Module

TK060.900 Height Adjustable Arm Module provides maximum ergonomics by bringing the control panels to the desired working height. This feature allows operators working at the same point to vary their own ergonomics, increasing efficiency. When in the horizontal position, the height-adjustable arm can move 300 mm down and 300 mm up. The load on the arm should be at least 7 kg - maximum 30 kg. There is a special adjustment part on the product for the load to be applied to the system and this sensitivity can be adjusted externally with an Allen key.

Weight	7820 gr
Width	700 mm
Height	132 mm
Depth	88 mm
Color	RAL 7035
Material	Aluminum-Steel
IP class	No
Rotatable	No
Tiltable	Yes
Package	1
Package size	728x195x110 mm
Customized colours upon request	Contact
